

On 15 November 2011, Bulgarian team of the POPDAT FP7 project had a team meeting. Ludmil Bankov presented a summary of the main decisions and approved timing for the next tasks taken on POPDAT's meeting in Warsaw. Main topics were:

- D2.2 delivery- Wave catalogue's file structures and format
- ISW service requirements and our contribution to the final document
- TID's, Bubble and Blob recognition software- possible approach to the data that should affect data record structure

On the figure below a photo of Bulgarian team members is given (from left to the right, Pencho Marinov, Institute of Parallel Processing, A. Vassileva and L. Bankov from SSTRI).
